

BALAJI JAYAKUMAR

Cloud Administrator | Multi-Cloud (AWS & Azure) & DevOps Engineer

Chennai, India • +91 9585840473 • balaji93bobby@gmail.com

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with **5+ years** of professional IT, cloud operations, and software development experience across AWS, Azure, and GCP. Proven expertise in automated infrastructure provisioning via Terraform/IaC, container orchestration (Kubernetes/EKS/GKE), FinOps cost optimization, hybrid networking, and ITIL-aligned SLA operations. Demonstrated history of leading disaster recovery drills, automating scheduled resource lifecycle workflows, and executing large-scale network architecture migrations that generated over **\$144,000 in annualized cloud cost savings**.

TECHNICAL SKILLS

Cloud Platforms:	Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP)
Compute & Containers:	Azure VMs, AWS EC2, GKE, EKS, ECS, Docker, Kubernetes, Helm
Storage & Databases:	AWS S3, Azure Storage/Blob, Cloud SQL, RDS, DynamoDB, Redis
Networking & Security:	VPC/VNet, VPN, ExpressRoute, Direct Connect, NSGs, Security Groups, WAF, Cloud Armor, IAM/ RBAC, Entra ID, Route 53, DNS, Load Balancers (ALB/NLB, Gateway API)
IaC & Automation:	Terraform, Terraformer, CloudFormation, ARM/Bicep concepts, Python, Bash, Azure CLI, AWS CLI
Monitoring & Observability:	Azure Monitor, Log Analytics, AWS CloudWatch, Datadog, Prometheus, Grafana, ELK Stack
Cost & Operations (FinOps):	Cloud Cost Management, Resource Rightsizing, Reserved Instances/Savings Plans, Automated Scheduling, ITIL Incident & Change Management

PROFESSIONAL EXPERIENCE

Movate Technologies Private Limited • Senior DevOps Engineer **09/2025 – Present**

- **Architected and executed enterprise-scale network migration** from **822 legacy Ingress resources** to a centralized Gateway API architecture across QA, UAT, Pre-Prod, and Production environments (\$14.60 saved per Ingress monthly), delivering **\$12,000 in monthly savings (\$144,000/year)** by eliminating redundant load balancers.
- **Engineered automated resource-scheduling tools** using Python FastAPI and serverless functions to stop and restart multi-tier environments (Cloud SQL, node pools, data pipelines) on weekends, cutting off-hours compute costs by over 30%.
- **Spearheaded enterprise Disaster Recovery (DR) readiness** initiatives by discovering and reverse-engineering manually configured cloud infrastructure into modular Terraform code via Terraformer.
- **Hardened network security boundaries** and API traffic across distributed workloads using Cloud Armor security policies, API Gateway rate limiting, and private service access proxies.
- **Maintained 99.99% infrastructure uptime** across production Kubernetes clusters with automated SSL/TLS certificate renewals, role-based access control (RBAC), and Log Analytics monitoring.

Ardens Business Solutions Private Limited • Senior DevOps Engineer **03/2024 – 04/2025**

- **Reduced AWS operating expenditure by 24%** by implementing FinOps principles, rightsizing underutilized EC2/RDS instances, and executing Reserved Instance and Savings Plan models.
- **Automated end-to-end multi-tier infrastructure provisioning** across Dev, UAT, and Production environments using Terraform and CloudFormation.
- **Deployed secure hybrid networking frameworks** encompassing VPC peering, transit routing, VPN tunnels, NAT gateways, and WAF rulesets.
- **Built centralized observability and alerting dashboards** using Prometheus, Grafana, and ELK stack, cutting mean-time-to-resolution (MTTR) for incidents by 20%.
- **Configured automated cross-region snapshot lifecycles**, backup vaults, and DR recovery plans for relational databases (RDS) and S3 object stores.

Coyna LLP • AWS Cloud Engineer (Project Engagement) **2023 – 2024**

- **Delivered turn-key cloud architecture** for Dev/UAT environments on AWS utilizing VPC, ALB, Auto Scaling, Security Groups, ECR, and RDS.

Testsigma Technologies Pvt Ltd • AWS Solutions Engineer **12/2022 – 07/2023**

- **Designed and maintained AWS infrastructure** (ECS, EKS, RDS, VPC) supporting high-availability enterprise client deployments.
- **Built CI/CD automation pipelines** utilizing AWS CodePipeline, CodeBuild, and Jenkins, accelerating deployment velocity by 40%.
- **Integrated Datadog and CloudWatch application monitoring** to proactively identify latency bottlenecks and maintain strict SLA standards.

Concentrix Technologies India Pvt Ltd • AWS Support Engineer **01/2022 – 09/2022**

- **Handled L2/L3 incident resolution** and operational requests for multi-tenant AWS enterprise environments following ITIL service desk processes.
- **Configured and enforced granular IAM policies**, role delegations, and security group rules to eliminate unauthorized resource access.
- **Automated recurring administrative maintenance tasks** using Python and AWS Lambda, reducing manual intervention by 25%.

Bright Champs Tech Pvt Ltd • *Technical Trainer & Software Instructor*

08/2021 – 01/2022

- **Delivered technical instruction** on software development curriculum, foundational programming logic (Python, JavaScript, Web Technologies), and interactive coding environments.
- **Mentored learners in software engineering principles** through project-based application development, code reviews, and structured problem-solving sessions.

CERTIFICATIONS

- **Red Hat Certified Specialist in OpenShift Administration**
- **AWS Certified Cloud Practitioner**

EDUCATION

Bachelor of Science in Computer Science • Alagappa University
